Benioff Ocean Science Laboratory is Hiring Interns!

**Data Analysis**
Analyze ship and whale data, annotate and organize plastic pollution image data, and support the data and reporting needs of projects.

**Science Communications**
Support our internal- and external-facing communications about the array of marine-related issues in our diverse portfolio.

**Software Engineering**
Work with Benioff Oceans engineers and scientists to build software tools that will support our various projects and technology infrastructure.

Visit our **website** for complete descriptions and instructions for how to apply.

Applications due September 1, 2023

Internships are open to UCSB undergraduate and graduate students only.
